Developer:  
Cherry Pop Games  
Release Date: 7 Dec, 2015

a09c17d780

English,French,Italian,German

---

\u2b50\u2b50\u2b50\u2b50\u2b50. Like a Youtube poop for the post-ironic, proto-digitcore, retrofuture-punk teen in all of us.. A good fun little game. You can play for ten minutes or 2 hours and always have fun in this simplicitic Card game / RPG mix.. Simple and fun. Puzzles are challenging and very satisfying when you beat them.. Where is turkish language ? But good game reigns love Game of thrones very love.

---

PLEASE Developers make more stages. That's the main thing preventing me from having fun and purchasing a Character Model pack. You need more Creative stages. Not just boring rectangle shaped stages. Stages that are different shapes, have different pros and cons, stages that require different strategies. It's really boring playing the same few stages over and over. That was the main problem with Bomberman, it was boring. And that's why bomberman died off. There was no strategy other than avoiding "plus shaped" bomb splash damage on a large rectangular shaped level.. The final battle is a buggy mess, none of the bastards even drew their weapons. I'd recommend waiting for a sale to pick up this dlc because it's just too short to warrant the price tag.. so hello i buy this game and it works but i get an error if i have no mod

Assertion failed!  
game->NumCars > 0

(file ../code/game/user/user.cpp, line 319)

please fix this PLEASE. UI is confusing, for example a check box has 3 different states. Checked on, checked off and - . You can look for a help doc embedded in the program but I didn't find it. The PDF I found online was very short on explanation (also can be found at bottom right of this page).

Seems to me the only way to use it and to get it to function the way I expect it to is if I also pull up a very large thread on [Polycount.com to read through all the questions and answers. Going through it you see a reviewer bring up multiple amazing improvements along with other commenters..years ago..and for a \\$65 dollar program the updates do not come at all often, the last one was about 16months ago I think.](#) [I bought it based off of a review online and I think it has amazing potential especially if the improvements were made that were suggested by multiple commenters. Im curious if the indy version is just being neglected and the Commercial Edition has better features/Voptions...if not, I do not recommend anyone spending \\$130 on it at this point.](#) [I really see this being an amazing tool if it was actually updated and its developer supported the software. Fingers crossed that in the future my \\$65 will pay off.. For a basic logo creation piece of software it's not that bad for the price! Lots of clip art and easy text manipulation. The shape creation tool is very basic and fiddly though. I have found it much easier to create images in other programmes and then import them into the software to add to the logo. I bought it in the half off sale so really good for kids or professionals looking to knock up a few nice looking logos. If you're a graphic designer, wanting to do more than just some logos or expecting the depth of photoshop however you'd be better looking elsewhere!. I really like the concept, but I didn't enjoy this game. I didn't play long, but long enough to realize most of my playtime was frustrating because I was fighting the user interface and control scheme. I also couldn't figure out how to purchase new weapons/solar panels for my ship. I couldn't tell which things persist between missions and which don't. When you load, it's where you left off before starting the mission, but apparently when you edit your ship, that's saved outside of missions...I don't know. Very confusing. The ship building UI is a jumbled mess of buttons, and I can't figure anything out.](#)

[This game needs to be simplified. It feels needlessly complex, almost like it's a stream of development/design consciousness. The survey pops up in your face asking what kinds of things should be improved before you've even played the tutorial. Also, the control scheme feels really clunky, at least for keyboard/mouse \(my preferred controllers\).](#)

[Neat idea, but I can't recommend this game in its current state.. Solid platform game. Wow... Just...wow...](#)

[This game, Sorcery! Part 1 and 2, which I thought I'd be able to finish in a couple of hours, kept me entertained for much longer. Part 1 may be somewhat short, but I believe this is the reason they sell Part 1 and Part 2 together. Part 2 is super long.](#)

[Of course, how long it is depends on how you play. I personally tried several different choices during most decision making moments, just to see how taking those paths would play out. There is so much to do, and so many things you may miss out in the game by taking only one path. And yet, it is quite impossible to cover all possible paths in one "playthrough" - and the game knows this too, apparently.](#)

[One thing is for sure - this game is very logical. As one other reviewer mentions, don't be stupid. Make conscious, careful decisions as they may affect you negatively, whether immediately or later on in the game. And while ones that affect you immediately may be reversible - with the ever-useful rewind button - the ones that come back to bite you in the butt later aren't \(unless you're willing to redo everything\), and can be quite a cause for some...deep, deep regret. \\*ahem\\*](#)

---

[Anyway, this game is fantastic! Play it, I say!](#)
